Product Owner: All About Choices

“We can do anything, but we can’t do everything!”

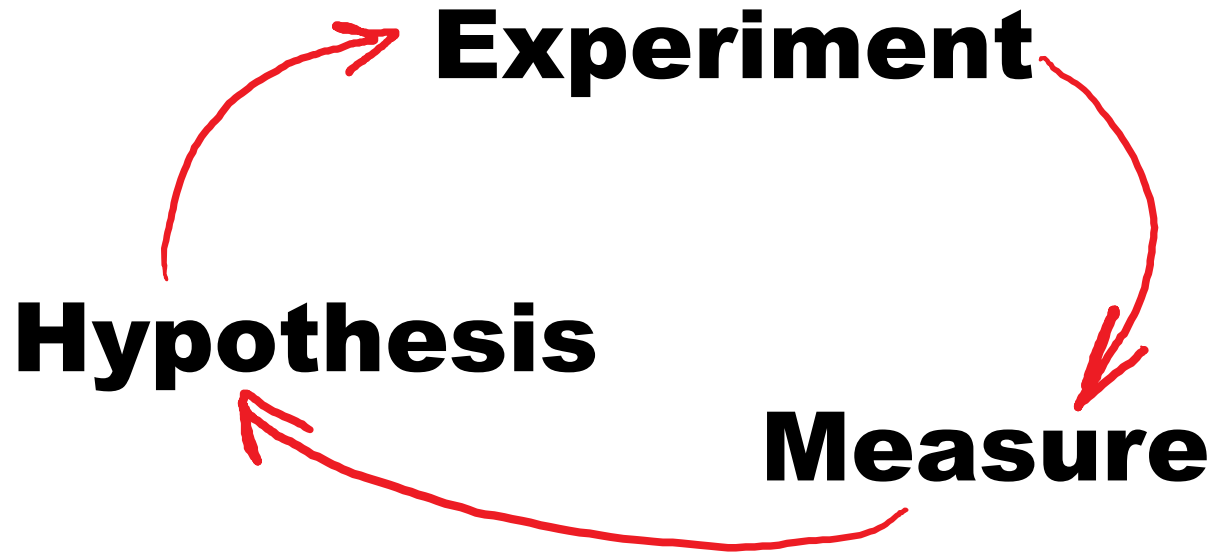

Dave Dame, Professional Scrum Trainer

What is Empiricism

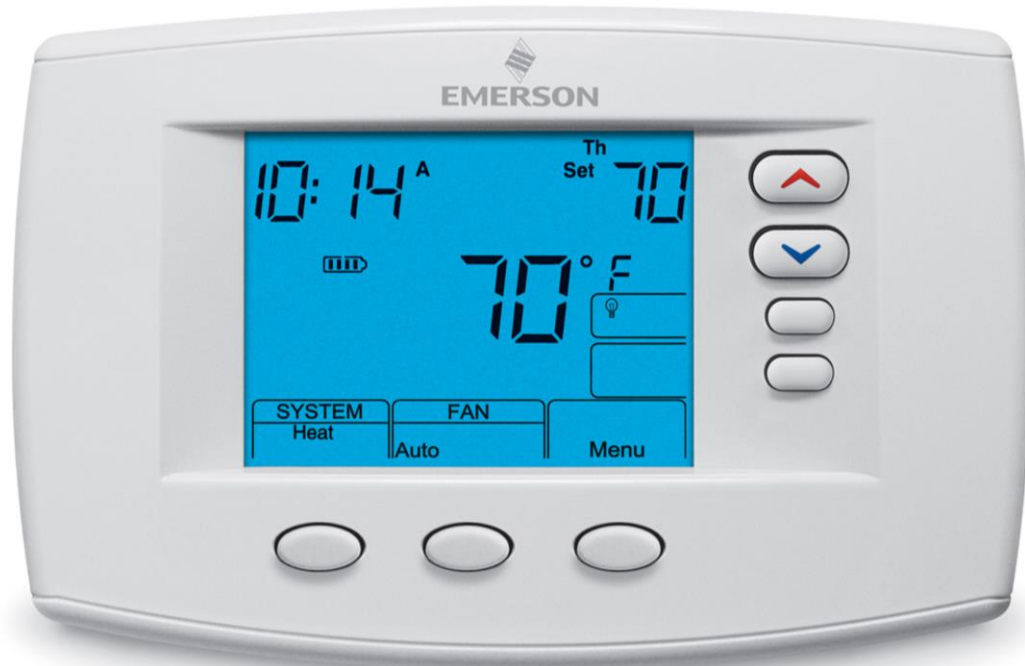

- The theory that the origin of all knowledge is experience. It emphasizes the role of experience and evidence in the formation of ideas.
- And what is the most famous empirical method?...

In Other Words...Feedback Loops!

Empiricism

- Goal
- Inspect
- Adapt
- Transparency

What's the Ultimate Goal?

revenue

investment

“... we must express changes ... in the same unit of measure. This unit of measure should be **life-cycle profit impact**, which is the ultimate measure of product development success.”

Don Reinertsen, The Principles of Product Development Flow, 2009

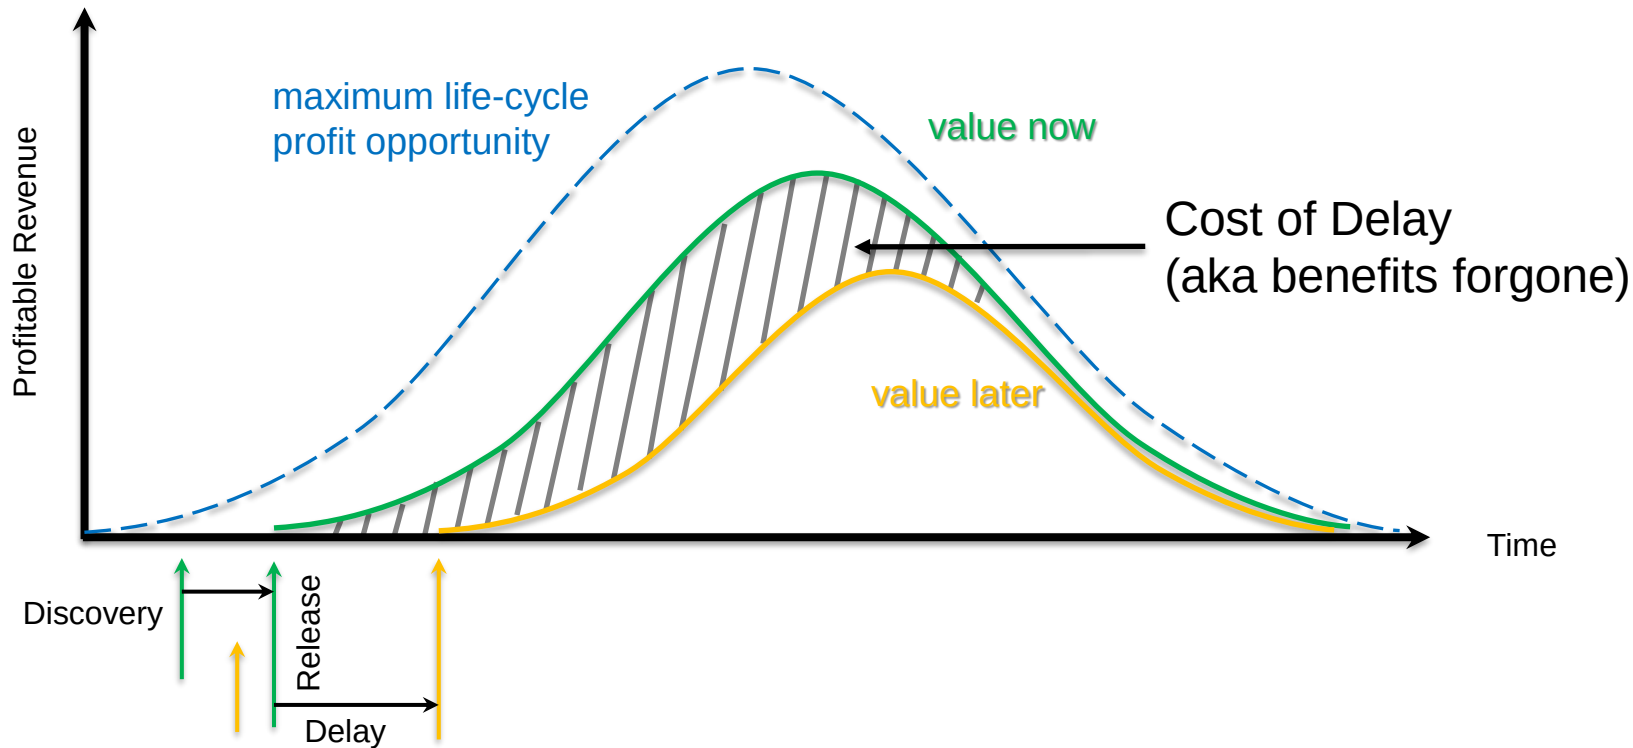

market
share

customer
delight

Product Owner as Steward

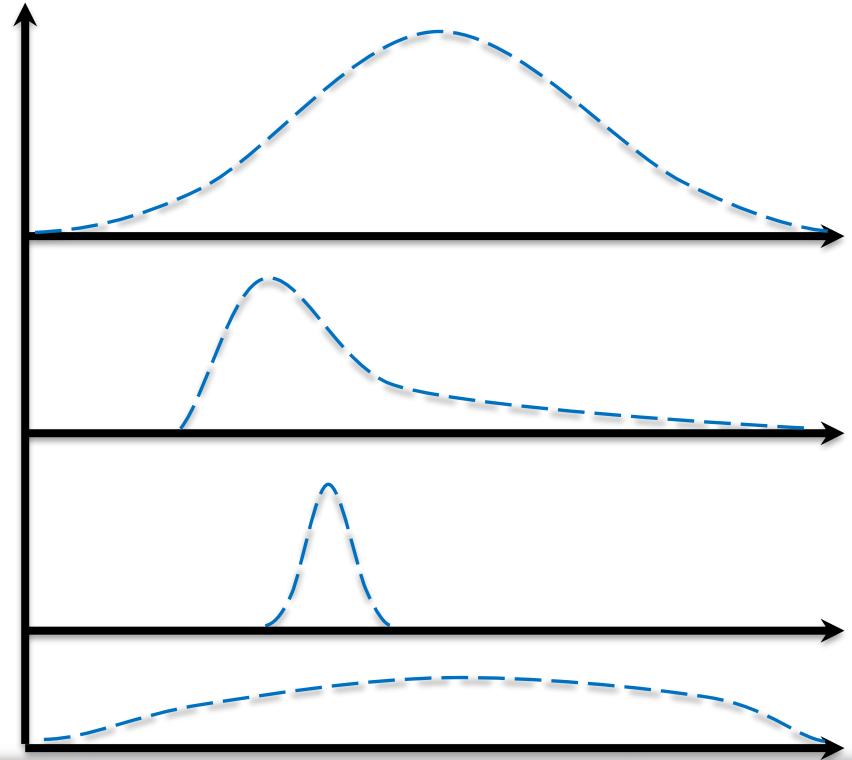

It's All a Trade-Off

Maximizing Realized Return

- Sequencing potential value-added opportunities determines the overall economic returns to the organization

Empiricism In Action

Empiricism Reduces Risk

For the Product Owner

Of doing the
wrong thing

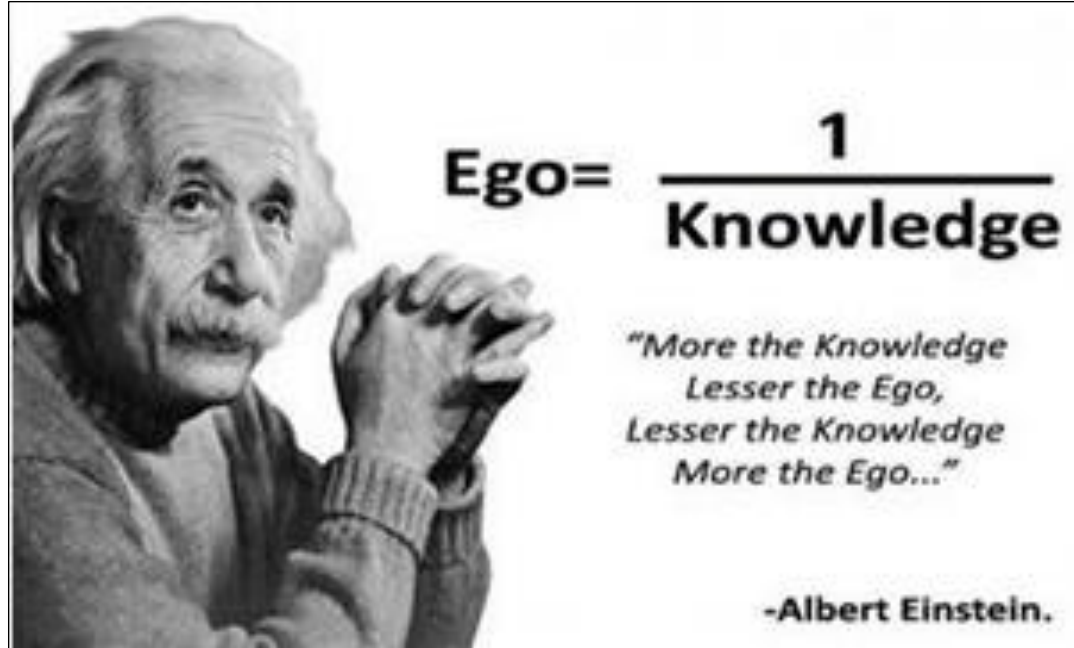

For the Development Team

Of building the
right thing the
wrong way

Learn Fast...Forever!

The Hard Part

Conclusions

- Empiricism is what makes agile development different!
- Check your ego and experiment
- Use experience to guide you to your goal

Thank You!
